Lori

The tank we are wondering about is South Tank 7. We were told it was approved but until processed through your system it would not be ready to go.

Could you just send me what you are guys are reviewing?

Thanks
Gary

Gary,

Lonestar Ecology is a discharger to GCA's Bayport Facility.

I oversee the Washburn Tunnel Facility. While I can't really push anything through,

The appropriate people will be made aware of your concern.

Thank you,

Greg N. Seay

Greg:

We are shipping contaminated oily water to you guys through Lonestar Ecology. We seem to be have trouble with getting final approval on a waste stream due to your approval system being down. It has apparently been verbally approved but until it gets into your system we can't ship. Is there a chance you can push this through so we can begin moving this material?

Thanks
